

Rammstein Clock Product Guidelines

1. Package contents:

- TFA Quartz clock motor incl. clock hands
- Steel dial in silver
- Steel cover in black

2. Material information:

Commercial steel can rust. These processes are normal and do not affect the shelf life of the clock.

3. Instructions:

1. Lie the steel dial on a suitable surface
2. Lie the black cover behind the steel dial
3. Fit the small black washer over the clock motor and insert the motor through the cover and the dial
4. From the front, attach the small silver washer on the tip of the clock motor and tighten using the nut
5. Fit the clock hands onto the motor

The exact sequence can be seen in the sketch below:
